For Publishers

Maximize your revenue by offering to your customers PayCheckr's revolutionary user-centric payment system (patent pending).

The PayCheckr button will allow the customer to select from a wide array of payment methods or value platforms (such as ad support, surveys, affiliation, coupons...), and easily revise these choices they'd store in their account with you.

The options behind the PayCheckr button you offer your customers are flexible, and can be easily customized by the Publisher.

When you select the **Get PayCheckr Now** button from our home page you will be taken to the **Create your button** page. Here you will get to customize, preview and generate the code for your button.

With the Paycheckr button created to your satisfaction, you can generate the code, and insert it into your web page. And know that you are giving a maximum level of flexibility to your customers to improve your payment/value revenue.

PayCheckr's powerful new user-centric model (patent pending) gives customers 'Many Ways To Pay'—more than ever offered before.
